

BIO SIMILAR
WORKSHOP
DIGITAL EDITION

BIOPHYSICAL APPLICATION OF CALORIMETRIC METHODS IN BIOTHERAPEUTICS DEVELOPMENT

Biosimilar digital workshop with TA Instruments presents virtual workshop on Isothermal Titration Calorimetry for the Characterisation of Protein and Small Molecule Interactions and use of the Nano DSC Technique for the Study of Protein Stability.

Join us at our presentation and workshop to discover, through illustrated examples, the advantages of ITC and DSC in protein binding and thermal stability assays. Talks will be followed by live demonstrations and training with the opportunity for you to discuss your analysis requirements.
