High Throughput Screening & Detection Solutions for Discovery Research

Biosimilar workshop is an annual event of the Institute of Chemical Technology. This event is a pioneer program in India and mixed with expert talk and experimental training. The event was initiated in 2017 in recognition of the importance of bio-pharmaceuticals in India, particularly that of producing affordable bio-pharmaceutical therapeutics. Our aims to bridge the gap between academia and industry by providing focused lectures and hands-on-training on biosimilars with special emphasis on monoclonal antibodies.

Biosimilar workshop Digital edition proudly presents a joint technology webinar with PerkinElmer. With a mission focused on innovating for a healthier world, PerkinElmer enables scientists, researchers and clinicians to address their most critical challenges in science and health by offering unique instrument, informatics and service solutions for advanced testing and analysis. We deliver unique solutions to serve the diagnostics, life sciences, food and applied markets. Globally, its dedicated team includes 13,000 employees across 180 countries.

Key Learning:

- Multiple detection modes
- Best technology for academia
- Reagents for your research
- Applications in drug discovery
- Orthogonal approach & future
